

WEROAQUA

- Dampening rollers for the IPA reduced or free printing

Dampening form roller (C305-12) for the IPA reduced (< 6%) or free printing:

- The hydrophilic surface ensures an excellent wetting (also with 0 % IPA)
- Extra reduction of the potentiometer is possible
- The water provided forms an exceptionally thin film and produces an even balance between colour and water.

Important:

Don't use this compound for the dampening form rollers of the following machines:

- MAN ROLAND
- KBA
- KOMORI

WEROAQUA

- Dampening rollers for the IPA reduced or free printing

Metering or pan roller (C253-60 / C353-60) for the IPA reduced (< 6%) or free printing:

- Optimum damping medium dosage and transport - over its lifetime
- High swelling resistance
- The water marks in the newspaper printing area can be reduced
- Larger area for the potentiometer through improved transport behaviour

A comparison of fluid quantity
