

WERODAHL

- Dampening rollers for sheet-fed printing
- Metering / pan rollers for web and continuous printing
- Dampening form rollers in the newspaper and rotary machine printing

This special dampening roller compound (C253-01 / C303-01 / C353-01 / C403-01) offers the following advantages:

- High mechanical resistance / Delta – or Vario system
- Hardness stability
- Excellent combination between rubber and core to prevent relief
- Homogeneously emulsion / properties of a damp former
