

WERO - UV

- Ink rollers for pure UV printing

The well tried and tested ink roller compound (D302-11/ D403-53) for the pure UV printing with:

- High extraction resistance to the used media, also with 30 ° Shore A
- Excellent ink distribution
- Easy wash ability (lower resetting times if the inks are changed)
 - A pure UV cleaner for EPDM rubber is to be used
- Minimised heat-build-up
- Excellent combination between rubber and core to prevent relief
